

CLF Regional Hubs Community Guidelines

To foster a positive and effective environment, we emphasize respect, inclusivity, and collaboration. Adhere to professional standards, maintain confidentiality, and stay aligned with CLF’s mission. By following these guidelines, we can work together effectively to advance our shared goals in reducing embodied carbon.

Respect and Inclusivity

- Embrace diversity and treat all Regional Hub members respectfully, valuing their unique perspectives and expertise.
- Foster an inclusive environment where everyone feels welcome and heard, regardless of background or opinions.

Communication and Collaboration

- Encourage open and transparent communication among Hub members, promoting collaboration and idea-sharing.
- Work together to leverage skills, resources, and knowledge towards achieving carbon reduction goals.

Professionalism and Integrity

- Uphold professional conduct and integrity in all interactions within the Regional Hub.
- Adhere to ethical standards and promote honest, transparent practices in initiatives and engagements.

Adaptability and Flexibility

- Embrace flexibility and adaptability to address the diverse needs of communities when reducing embodied carbon.
- Remain open to diverse viewpoints and feedback, adjusting strategies as necessary for more effective outcomes.

Confidentiality and Respect for Privacy

- Respect the confidentiality of sensitive information shared within the Hub.
- Safeguard the privacy of fellow members and avoid sharing personal information without consent.

Compliance with Policies and Guidelines

- Adhere to CLF's established guidelines, policies, and code of conduct when organizing events and engagements.
- Uphold legal and ethical standards in all Hub-related activities and collaborations.

Representing the Regional Hub

- When representing the Hub externally, ensure alignment with CLF's mission and guidelines.
- Refrain from making commitments or statements on behalf of the CLF and ensure any publications follow the publication standard (coming in 2024).

Commitment and Engagement

- Demonstrate dedication to reducing embodied carbon in buildings and infrastructure, aligning with CLF's mission.
- Actively participate in Regional Hub activities, meetings, and initiatives to contribute towards carbon reduction efforts.
